THE PROBLEM

For a business to run efficiently, it is vital for the business platform (website/mobile application/software) to be well-functioning. There are several service vendors whose promises are limited to brochures and aren't able to deploy it in reality.

Resultantly, they create software solutions that lack innovativeness, and they drive customers away. There is in-active software development process, low standards of quality with errors and bugs. There can be issues related to product usability, performance, security, compatibility, testing that are usually faced by end customer.

⚠️   Do you own a not so good or a low featured software?

⚠️   Are your customers bouncing back due to slow site-loading time?

⚠️   Is your product full of unwanted clutter and chaos?

⚠️   Are you struggling to make your business platform(website/mobile application/software) visitor friendly?

⚠️   Do you want a customized solution for your business?

THE SOLUTION

Connect with a team of smart thinkers and problem solvers - **Software Specialists**.

Fusion Business Solutions has a pool of software developers backed with years of experience in supporting clients with software needs. The team of software developers demonstrate qualified professionals who can work with proficiency and right intellect to fulfill the expectations. Our professional coders write neat, clean, and error-free codes that are also validated.

We provide our clients with full control over their software, websites, and applications through training of their in-house teams. We cover majorly Four aspects of working: development, quality control, quality assurance, and testing. We help in the daily management and customizations of their business platform developed by us.

OUR DIFFERENTIATOR

We put ourselves in your shoes and look at the things from your lens.

Dedicated Experts at your Service

We have a team of dedicated Designers/Developers, so no more settling with "Jack of all trades"! Your business needs passionate and accountable experts to run everything smoothly. And that is exactly why we are here to provide you.

Round-the-Clock-Service

Be it dusk or dawn, Sunday or Saturday, Christmas or Easter; we work 24/7 with optimum workforce. We're your pair of hands that will keep working even while you are asleep. If you perform business overseas or deal with international clients, we're a perfect fit for you.

Listen and Remain Transparent

We like listening to the clients and their needs. Getting clients is important for the business to survive. Having said it, we always suggest clients the best suited process and options. No worries if you are not able to put up your requirement, we will try to put all of them for you.

Accountability

The offshore team that is handling your Software Development needs and take the entire authority of the process. As the business owner or executive, you can rest assured that the delegated tasks will take place at the right time.

Work under one Roof

We are a team of 50+ employees working under the same roof. We meet each other daily and work as a team. When you work with our expert designers/developers, it not only broadens the area of knowledge but also adds more skills and value to the business. The speedy and high quality of work comes along with great security.

Overseas Advantage

The advantage is we are based in India. If that sounds like a USP, then yes, we are proud of it. We are blessed with business-friendly economy and environment. It allows us to serve clients in a cost-effective way, hire skilled designers/developers, and pay them well. We optimize the socioeconomic boon for improving work quality and team building.

Backup/Substitute Staff

We provide backup staff if you hire our designers/developers, they work exclusively for you. In the case where the person falls ills or quits the company, the backup designers/developers will be there to work with you. Thus, your work will never suffer.

Confidentiality of Information

The designers/developers work under 24/7 CCTV camera surveillance and every system is monitored by the IT department. Moreover, the background inspection of our employees and signing of Non-Disclosure Agreement (NDAs) is the way we ensure that any leakage of information can lead to termination.

PMTCT (MHEALTH PORTAL), SWAZILAND, AFRICA:

Swaziland has one of the highest HIV prevalence rates among pregnant women in the world. Swaziland is taking bold steps to address this with optimizing ART (Standard Antiretroviral Therapy) for every HIV infected pregnant woman and implementing early infant testing for HIV to reduce the number of new HIV infections in children. Viral load testing is key for monitoring expectant and lactating HIV infected mothers who are on treatment to prevent transmission of HIV to the infant.

However, systems to ensure that all HIV infected pregnant women get tested, linked to care and stay on treatment need strengthening. Swaziland has a centralized laboratory which performs diagnostic tests for viral load and DBS (Dried Blood Spot) tests. However, the results notification system is weak and increase the turnaround time for results delivery and linkage into care and treatment which results to low rates of follow up of patients.

Thus MHealth Portal's perspective is to allow Health workers and other users of system to do following tasks : New Patient Registration and Sample Collection View all patient registered in the system Search on basis of patient ID, Name, Contact number, Age, Height. View patients who have missed their appointments Patient visit monitoring and escalation Register and view orphan babies Baby enrollment and enlistment treatment program Check upcoming visits of patients and change date of visit in case if manual change of visiting date is required.

Reports that displays the patients who reports are delayed for more than a month. 15 Report with dashboard and Pie chart report. Admin can register User into the system and reset password on request.
View all reports. (enlisting all reports name)

Technologies: Windows Azure (Cloud), .NET MVC 5 and PHP (developed in both), Web API, AngularJS, HTML5, MySQL

BUSINESS MODEL TO SUIT YOUR BUSINESS CONCEPT

We create, deliver and capture value for the clients with our distinguished business model. It's worth pointing out the way we will help you at each step to smooth running of the business.

BUSINESS MODEL

Requirement Study/ Request For Quote
The team of software developers conducts system analysis, list down product specifications, and anticipated changes to be made. During this evaluation process, the best quote is chosen and discussed. The contract will be finalized afterward – after discussion of pricing and final date of delivery.

Dedicated Staff
No matter the industry/service type, we provide a dedicated designers/developers and a team to work on your business needs. The team encloses a group of experts trained as per the required skillsets. The accounts manager, designers/developers, & explicit team members will work together, brainstorm, and boost your business.

Project Based, Fixed Plan Contract
In the case of software projects, you only focus and talk about the software product you've envisioned. You will get to know from the very start about what the product or software will do, and estimated time to build and release the project. For new requirements, the process will repeat.

Customized Requirements
We provide a myriad of services covering various industries to fit your requirements. Also, you can extend your unique requirements and get the best possible help from our dynamic team members. The customized processes and reports are one thing that helps us stand out.

Easy Communication
We believe in easy and smooth communication on work-related matters. Be it about giving instructions or free exchange of views, Skype or Google Hangouts or Line, we want you to feel comfortable and remain reachable for our clients. It will lead to saving of time and raise potential at hand.

OUR PROCESS

Request for Quote

The team of software developers conducts system analysis, list down product specifications, and anticipated changes to be made. During this evaluation process, the best quote is chosen and discussed.

Team Interaction

When the developers know project requirements, they are introduced with the client to understand the context and expectations. It will create a platform for regular meetings, training sessions, & timely feedbacks.

Development and Launch
In this phase, the product/website/application will be designed, built, and released according to the plan. The building of project includes front-end, back-end, infrastructure development, UX/UI design, QA, and testing.
Post Development

The goal of post development phase is to gather feedback to identify where the project should go and features to build next. The later phases also includes support, server maintenance, &response to the emergencies.
